## DETAILED ACTION

### *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach the step/processor for performing the first approximation, determining the bounds of the first approximation, performing the second approximation, and converting the second approximation into the path length difference as found in claims 1 and 17 and in combination with the other limitations the claims. In regard to claim 29 the prior art fails to teach, in combination with the other limitations of the claim, constructing a Fourier transform using M of the N points extracted, limiting the Fourier transform to the evaluation of less than M samples, and identifying from among less than M samples an approximation of the interference frequency as a measure of the path length difference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
